

# Auto-Fill Foil Outlet Instruction Sheet

1. The Dual Split-Second Sizer includes a quick disconnect port located on the back of the unit. The Auto-Fill Foil Outlet will easily snap into place when pushed into the port.

2. Place the foil balloon over the brass inflating outlet. Pinch the neck of the balloon between thumb and forefinger and press down on the outlet. Support the foil balloon in an upright position to insure the neck of the balloon does not fold over the outlet and restrict the flow of helium. When the balloon has reached the proper pressure the inflator will automatically shut off the helium flow.

Remove the balloon from the outlet and attach a ribbon and a balloon weight.

## Additional Dual Split-Second Sizer Accessories

### HI-FLOAT® Outlet

The hand-tight HI-FLOAT® Outlet enables the user to inflate balloons filled with HI-FLOAT® neck up. This prevents any HI-FLOAT® from getting into the Dual Split-Second Sizer.

### 60/40 Helium/Air Outlet

The 60/40 Helium/Air Outlet enables the user to inflate 14" or larger balloons with a mixture of 60% helium and 40% air. The 60/40 Helium/Air Outlet easily attaches to the Dual Split-Second Sizer with a hand-tight connection.

### Air Compressor Hook-Up

The Air Compressor Hook-Up, with quick-disconnect fittings, allows user to operate Dual Split-Second Sizer up to 12-ft. away from the compressor. Hook-Up air line also includes a filter that prevents dirt and moisture from entering the inflator.
