

Big Balloon Inflator Instruction Sheet

1. Hand-tight connect the Big Balloon Inflator to the cylinder.

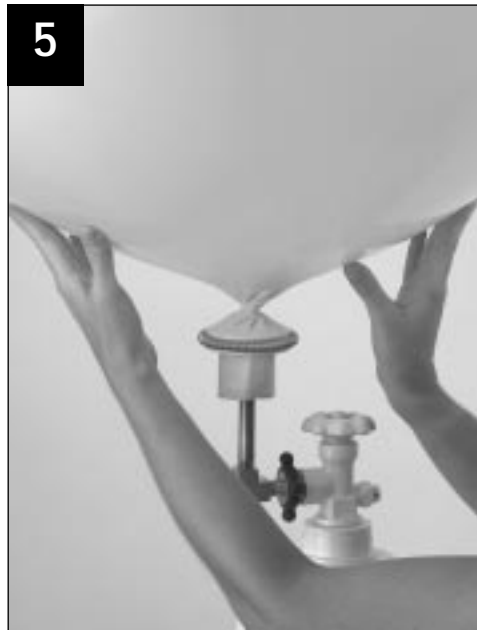

2. Remove the holding spring from disc. Leave the spring hanging from the inflator next to the handtight connection.

3. To secure the balloon to the inflator, stretch the neck of the large balloon over the disc and replace the holding spring in the groove. For best results, place the spring near the end of the neck of the balloon to allow for ease in tying the balloon. (See step 5 below.)

4. Slowly open the cylinder valve to inflate the balloon. When the balloon has reached the desired size, close the cylinder valve.

5. To tie the balloon, leave the balloon on the inflator and twist the body of the balloon. Tie ribbon or line to the twisted neck of the balloon to seal the balloon. Remove the holding spring (See step 2 above.) and remove the balloon from the inflator.

Related Products for Big Balloons

60/40 Big Balloon Inflator

Save 40% on helium costs while inflating 3-foot and larger balloons. To fill with helium only, simply cover the air holes on the inflator. Designed with built-in restricted flow to insure controlled inflation, the Big Balloon Inflator also features a hand-tight connection.

Conwin #81800

Deluxe Balloon Exploder Kit

Create dazzling special effects with Conwin's Pneumatic Balloon Exploders! Powered by helium or nitrogen, they're perfect for exploding balloon walls and confetti-filled balloons. They're also great for exploding large balloons over dance floors! Parts also sold separately.
