

## Interchangeable Snap-On Outlets

### Flex-Tilt Valve Outlet

The Flex-Tilt Valve Outlet offers maximum flow control and is ideal for manual inflation of foil balloons. The soft tapered tip works great on all size balloons. Good choice for use with Hi-Float®.

### Auto-Fill Foil Outlet

The Automatic Auto-Fill Foil Outlet simplifies filling foil balloons. Slide the tapered foil filling outlet into the neck of the balloon and press outlet. When the foil balloon has reached the proper size and pressure the inflator will automatically shut off the flow of helium.

### Helium/Air Outlet

The Helium/Air Outlet enables the user to inflate 14" and larger latex balloons and 36" foil balloons with a mixture of 60% helium and 40% air. Reduce your helium costs by up to 40%!

### Trigger Valve Outlet

The Trigger Valve Outlet enables the user to manually speed inflate foil balloons without damaging the foil valve. The long extension tip bypasses the internal balloon valve. Also works well with Conwin's Insider Balloon Stuffing Tool. Includes interchangeable 8-inch and standard length extension tips.

### Inflator Hook-Up

1. Firmly hand-tighten connection to the cylinder valve by turning the Hand-Tight Connection clockwise. Do not use a wrench.
2. Slowly open the cylinder valve. Cylinder pressure locks inflator in place leak-free.

### Inflator Removal

1. Close cylinder valve firmly.
2. Release pressure by pushing down on the push valve or lever valve outlet.
3. Unscrew hand-tight connection and remove inflator from cylinder.

### Interchanging Outlets

Select the appropriate outlet for the job and snap-on. To remove the outlet, slide the brass sleeve on the quick disconnect fitting downward and the outlet is released.

# Conwin Balloon Tying Discs

The Fast and Easy Way to Tie Balloons!

- Discs Increase Productivity by Attaching Ribbon and Tying Balloon.
- Discs Prevent Sore Fingers from Hand-Tying Balloons.
- Designed for Use with Latex Balloons Up to 16 Inches.

1 Feed curling ribbon through ribbon guide hole located under tying post. Place the balloon disc on tying post.

2 Hold the inflated balloon in your left hand. With your right hand, pinch the neck of the balloon and the ribbon together and stretch both around the end of the tying post.

3 Hold the stretched balloon neck and ribbon together in your left hand. Place your fingers behind the tying disc and slide the disc over the neck of the balloon.

4 Slide tying disc down approximately one inch on the neck of the balloon.

5 Remove tied balloon from post and cut the ribbon on blue ribbon cutter.

6 For a finishing touch, curl the ends of the ribbons.

## 4-Wheel Cylinder Hand Truck

The 4-Wheel Hand Truck doubles as a safety stand when in the tilt-back position. The rear wheel carriage folds up to enable ease in transporting the hand truck to the job and allows user to move cylinders up and down stairs. Attach the balloon inflator to the cylinder parallel with the handle of the hand truck.

## Replacement Ribbon Cutters

The Ribbon Cutter includes a Disc Tying Post. The entire unit unscrews and is easily replaced when blade gets dull. Available from your distributor or online.

**CONWIN CYLINDER SAFETY PRODUCTS:** To insure worker safety, cylinders should always be secured in the work area and during transportation. Conwin's Cylinder Safety Stand and Cylinder Safety Bracket secure all size cylinders.

### CYLINDER SAFETY STAND

FREE STANDING

The cylinder safety stand features two velcro® safety belts to support all size cylinders. A must for worker safety in the shop and on the job. Durable steel construction.

### CYLINDER SAFETY BRACKET

WALL MOUNT

The Cylinder Safety Bracket provides an economical solution to securing cylinders in the work area. The cylinder Safety Bracket also works well when mounted to floor of a delivery van to secure cylinders during transport.
