

Conwin's Grip Guide Balloon Template Instructions

1. Place the ruled Template Strip on the edge of a table or work counter.

2. Press the black release button on Grip Guide to fully open the clamp. Position the open clamp with the brass tube pointing upward directly over the "0" measure on the Template Strip. Firmly squeeze the clamp to securely attach it to the countertop. Slide the brass upright into the tube and adjust until it is perpendicular to the countertop.

3. Repeat step #2, attaching the 2nd clamp to the desired setting on the Template Strip. To change the size setting, press the black release button on the clamp and reposition the clamp to the desired setting.

4. For best results, pull the slightly over-inflated balloon toward you through the two uprights. As you pull the balloon, slowly release the air until the balloon just passes between the two uprights.
