

# The Insider Balloon Stuffing Tool Instruction Sheet

View a demonstration of the Insider Tool on Conwin's Tools of the Trade DVD

## Set-up

1. Clamp the Insider Balloon Stuffing Tool to the edge of a table with the yellow square facing out.
2. Roll the neck of a large balloon down and stretch the balloon over the rim of the Insider. Make sure the balloon is centered on the Insider tool.
3. Hand-tight connect the Insider Inflation Tool to a Dual Split-Second Sizer or Duplicator 2. Set the automatic sizer to the appropriate size of balloon that will be inflated inside the large balloon.

4. Press the Air Hose over an outlet of the Air Force 4 (or any air machine) and turn the blower on. Place the other end of the Air Hose over the back port of the Insider tool and fully inflate the large balloon.

## Stuffing the Large Balloon

5. Stretch a balloon over the Insider Inflation Tool and insert the balloon into the back port of the Insider. Activate the automatic inflation cycle by pressing the foot pedal of the Dual Split-Second Sizer or the Duplicator 2 to inflate the balloon. (Squeeze trigger valve if using the 10ft Extention Inflator.) When the balloon is fully inflated, quickly remove the inflating outlet and stretch the neck of the balloon firmly for to create a seal, preventing air escaping from the large balloon. To fill the large balloon with the maximum number of balloons, repeat step 4 as needed.

## Tying the Balloons

6. To easily tie the balloon, place two fingers on the stretched neck and rotate your hand one full revolution to create a loop with the stretched neck of the balloon. Tuck the end of the balloon neck through the top of the loop to knot the balloon. Release the neck of the balloon into the yellow flap of the Insider.

## Related Products for the Insider

### Dual Split-Second Sizer

Unmatched for speed, accuracy, and efficiency, the Dual Split-Second Sizer lets you set your inflation time within tenths of a second. The hands-free foot pedal allows you to quickly inflate and tie balloons. The Dual Sizer is the most versatile inflator you'll ever own.

### Duplicator 2

The Duplicator 2 automatically inflates latex balloons at the touch of a button. The separate outlet inflates foil balloons to the right pressure and size. The Duplicator 2 can be powered by helium, nitrogen, or from an air compressor.

### Air Force 4

Featuring four outlets for fast simultaneous inflation, the Air Force 4 is a must for on-the-job decorating. The continual-air blower is designed to maintain a fixed temperature and not overheat on large jobs. The Air Force 4 is all you need for your air-filled decorating projects.

### The Air-Pro

The Air-Pro is ideal for fast inflation of air-filled balloons. The Air-Pro quickly and easily inflates all size balloons by pressing down on the push valve outlet. The push valve features an extension tip outlet for inflating small balloons and foil balloons. The Air-Pro motor runs only during the inflation cycle making it an ideal inflator for retail settings. Unit features a convenient carrying handle and 6-foot power cord.

### EXPLODER

### Deluxe Exploder Kit

The Deluxe Exploder Kit Pneumatic Balloon contains everything you need to explode balloons safely and easily. Exploders are non-electric and non-pyrotechnic. Powered by helium or nitrogen gas, they are perfect for exploding balloon walls and for special effects created with exploding confetti or balloon-filled balloons. Large exploding balloons are also great as balloon column toppers and over dance floors!

Kit Includes: Carrying Case, Compact Aluminum Cylinder, Automatic Cylinder Charger, Balloon Exploder Regulator, Detonator Box, 100-Foot Air Line, 6 Continual Exploders, 6 Elbow-End Exploders, 6 Connecting Tees, 6 Connecting Crosses, and 6 Air Line Splices.
