- Conwin #32230 Purple
- Conwin #32200 Green
- Conwin #32210 Yellow
- Conwin #32270 White
- Conwin #32280 Black

Designer Tips:

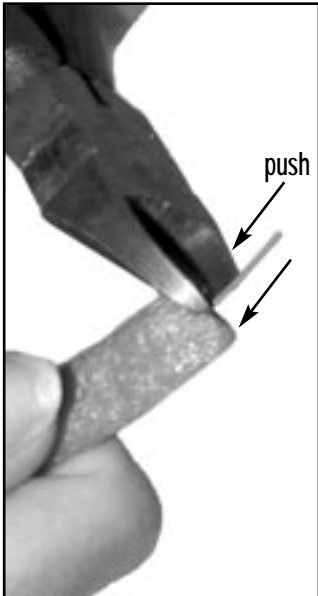

- Neon Foam Wire in letters and shapes, use cool glue gun to secure in place.

- Use Spray paint to create custom colors of Neon Foam Wire. Start with the closest base color available. For example, start with yellow foam wire if you are going to use gold spray paint.

See other side for great IDEAS for using Neon Foam Wire!

Important: Before using Neon Foam Wire in floral and balloon arrangements, always cut the inner wire back to leave a soft tip of foam at the end of each length.

Cutting Neon Foam Wire

Use wire cutters to cut Neon Foam Wire. Push the foam wire down and cut only the inner wire. The foam will spring back into place and leave a soft tip at the end of the wire. This provides a finished look and prevents the wire from popping balloons.

Attaching Neon Foam Wire

To attach Neon Foam Wire to balloons, tightly wrap the foam wire around the neck of the tied balloon just below the knot. Helium-filled 11 inch balloons will lift and support the weight of the foam wire. The foam wire will support air-filled 5-inch balloons.
