

Safety Stand Add-On Workstation Assembly Instructions

- Parts List:**
2 Support Arms
1 Workstation Table-Top

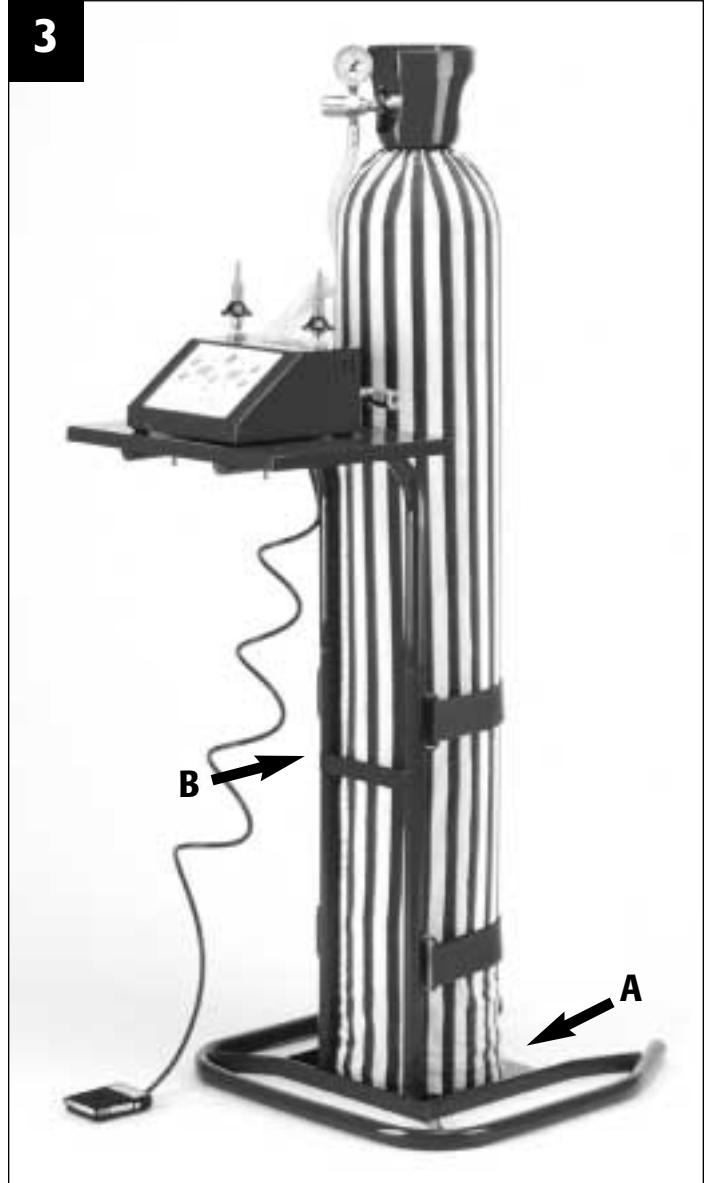

Important: Prior to attaching the Workstation, verify that your safety stand is properly assembled. Make sure the base plate is flat against the floor (See figure 3A) and the upright back support is facing away from cylinder (See figure 3B).

Place workstation tabletop face-down and insert support arms into holding pins.

Use a flat blade screwdriver to remove the black plastic caps from the top of the safety stand uprights. Invert table and slide support arms into safety stand uprights.

Press tabletop down firmly making sure it is level and fully secured.

Cylinder Safety Stand Assembly Instructions

- Parts List:**
 2 Velcro® Safety Belts
 1 Cylinder Baseplate
 1 Cylinder Support Upright
 2 Bolts
 1 Wrench

1 Position upright with "This Side to Cylinder" label facing inward, toward front of Safety Stand.

2 Using the wrench supplied, attach the upright to the baseplate and firmly tighten the bolts.

3 Place Velcro® Safety Belt on hook with fuzzy side facing outward.

4 Roll the cylinder into the safety stand until it is touching the upright supports. Orient the cylinder valve outlet so it is facing to the left. Place bottom Velcro® safety belt around cylinder and through loop. Tighten belt securely. Repeat with top belt. Cylinder should be very tightly attached to stand.
