

Cylinder Safety Wall Bracket Mounting Instructions

Cylinder Safety Wall Bracket
Conwin #30100

Mounting Bracket

Hold Cylinder Safety Wall Bracket against the wall and outline mounting holes with a pencil. For maximum support, position the bracket above the middle section of the cylinder just below the crown of the cylinder.

Mounting on a Wood Surface

- Drill an 1/8" pilot hole.
- Mount with screw provided.

Mounting on a Drywall Surface

- Drill a 1/4" pilot hole.
- Insert the anchor into the pilot hole.
- Mount with screw provided.

Mounting Multiple Brackets

When mounting several brackets in one workstation, bolt a 2"x4" board to the wall, and then use wood screws to mount the brackets in a row. Bracket also works well when mounted on the floor of a van to secure cylinders during transportation.

Other Great Conwin Cylinder Safety Products!
