

Airforce 4 Instruction Sheet

Getting Started

1. Attach the filling outlets. There are four blue extension tips for use with 5-inch latex balloons. Hand tighten the filling outlets with the extension tips to the Air Force 4.

2. Attach the power cord. Do not use the unit near water or in wet conditions.

Inflating 5-Inch and Larger Balloons

To inflate 5-inch balloons, place the blue extension tips over the filling outlets. To ensure an even flow of air, place the extension tips on all four outlets.

To inflate large balloons remove the blue extension tips from the filling outlets. To ensure an even flow of air remove the extension tips from all four outlets.

Air Force 4's four outlets allow two people to inflate four balloons at the same time.

Inflating Figure-Tying Balloons

To inflate a figure-tying balloon, place it over the filling tip and lightly stretch the balloon upward as it is being inflated.

Tip! How to Make Corkscrew Balloons

Pre-stretch the figure-tying balloon by inflating it fully and releasing the air. Hold the end of the balloon between your thumb and index finger and wrap it around your arm towards your elbow. Stretch the balloon slightly as you wrap it and be sure the wrap is free of kinks or twists. As the balloon inflates, allow it to wrap around your arm.

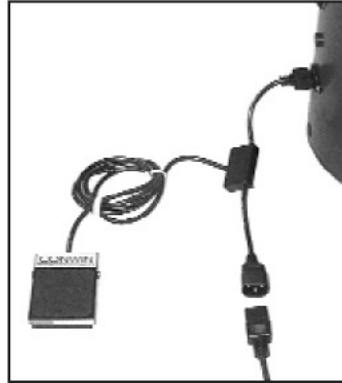

Related Products for Airforce 4

AF4 Add-On Foot Pedal

AF4 Add-On Foot Pedal

The Add-On Foot Pedal plugs into the Air Force 4 and features an outlet for the original Air Force 4 power cord. The Add-On Foot Pedal enables the Air Force 4 to shut off between cycles. It works exclusively on models with a detachable power cord.

Benefits

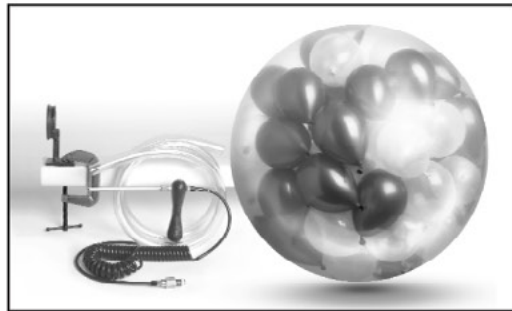

- Enables the Air Force 4 to work in two modes: continual on or foot pedal control.
- Convenient foot pedal enables Air Force 4 to be used retail in settings where balloons are inflated intermittently.
- When using the foot pedal, the reduced running time of the motor enables the Air Force 4 to stay cooler longer.

Benefits

- Inflates Any Size Balloon Inside Of Large Balloon
- Faster Than Other Methods!
- Enables User To Insert Heart-Shaped Balloons
- Ideal For Use With Exploders
- Air Hose Fits Most Air Blowers
- Easy To Set Up and Use!

The Insider

The Insider Balloon Stuffing Tool is an accessory item for Conwin's automatic sizing inflators. This fast and easy-to-use tool efficiently fills large balloons with the maximum number of small balloons. The Insider can be clamped to any convenient table or workstation. It is the perfect tool to create balloons for use with Conwin's Exploders!

Easy To Set Up!

Clamp the Insider Tool to a countertop and stretch a large balloon over the holding rim of the tool. The large balloon is filled with air using the Air Hose. The Insider Air Hose attaches to Conwin's Air Force 4, or most air blowers, and allows the user to fully inflate the large balloon through the one-way back port on the Insider Tool.

Automatically Inflate Balloons Inside Large Balloon!

Attach the Insider Extension Hose Inflator to a Dual Split-Second Sizer or a Duplicator 2 inflator. Set the inflator to the desired balloon size. Slide a balloon into the extension tip of the Insider Extension Hose Inflator. Insert the tool into the back port of the Insider Holding Tool. Activate the automatic inflation cycle by pressing the foot pedal on the Dual Split-Second Sizer or pressing the inflation button on the Duplicator2.

Tie And Release Balloons Inside Large Balloon

After the balloon is automatically inflated, pull the neck of the balloon out of the back of the Insider Holding Tool to form an air-tight seal. Remove the Extension Inflator from the neck of the balloon. Tie the balloon and release the neck of the balloon back into the flap on the Insider Holding Tool.
