

Super Speed Inflators Instruction Sheet

Dual Super Speed Inflator
Triple Super Speed Inflator

Inflator Hook-Up

1. Properly secure the cylinder. See safety tip below for details.
2. Hand-tighten the inflator to the cylinder by turning the handwheel clockwise. For best results, hold the inflator at a 45 degree angle and when the connection starts to get tight pull the inflator down to the proper horizontal position and firmly tighten in place.
3. Slowly open the cylinder valve. The cylinder pressure will lock the inflator in place. If the inflator should loosen during use, close the cylinder valve, release the pressure from the inflator, and repeat step 1.

Balloon Inflation

1. Place balloon over inflating outlet and press downward. The brass extension outlets allow for fast inflation without distorting the shape of the balloon.
2. When balloon has reached the desired size, remove it from the outlet. Tie balloon using Conwin's balloon tying discs. See other side for instructions.

Inflator Removal

1. Close the cylinder valve firmly.
2. Release the pressure by pushing down on the balloon inflating outlet.
3. Unscrew hand-tight connection. For extra leverage, push inflator arm upward in a counter-clockwise motion while unscrewing inflator from cylinder.

Replacement Ribbon Cutters

The Ribbon Cutter is easily replaced when blade gets dull. Available from your authorized Conwin Distributor. (4 pack)

Replacement Balloon Tyer Post

IMPORTANT SAFETY TIP: To insure worker safety, cylinders should always be secured in the work area and during transportation. Conwin's Cylinder Safety Stand and Cylinder Safety Wall Bracket secure all size cylinders and meet required safety standards.

Features durable steel construction designed to support all size cylinders. A must for worker safety in the shop and on the job.

Provides an economical solution to securing cylinders in the work area. Also works well when mounted to floor of delivery van to secure cylinder during transport.

Conwin Balloon Tying Discs

The Fast and Easy Way to Tie Balloons!

Benefits:

- Increase productivity by attaching ribbon and tying balloon.
- Prevent sore fingers from hand-tying balloons.
- Designed for use with latex balloons up to 16 inches.

Discs available in convenient 100 packs and 1000 packs.

1 Feed curling ribbon through ribbon guide hole located under tying post. Place the balloon disc on tying post.

2 Hold the inflated balloon in your left hand. With your right hand, pinch the neck of the balloon and the ribbon together and stretch both around the end of the tying post.

3 Hold the stretched balloon neck and ribbon together in your left hand. Place your fingers behind the tying disc and slide the disc over the neck of the balloon.

4 Slide tying disc down approximately one inch on the neck of the balloon. Remove tied balloon from post and cut the ribbon on the convenient ribbon cutter.

Grip-Strips

The strips grip the ribbon while you are on the job or at the shop. The adhesive backing allows for convenient placement on any clean surface.

Item #32070

Grip-Tabs

Ideal for centerpieces, simply stick the Grip-Tabs to any clean surface and tie on the balloons. Super Grip-Tabs are also available for larger boquets.

Item #32190

Conwin's Grip-It Balloon Holder

Item #32190

1. Clamp the Grip-It Balloon Holder to any convenient counter top.

2. Slide the ribbon sideways into the spring coil.

3. Half twist the ribbon and press it firmly into the spring coil. This insures firm spring grip on ribbon.

Conwin's Archline Dispenser Pack

Item #36050

It's easy to dispense your archline with our convenient pack! It clips right onto your belt, keeping your hands free while you work

Conwin's Archlines

Grips balloons securely and is unaffected by temperature. Will not stretch. Easier to work with than fishing line.

Available in 50# and 150# test.
